PROFILE

AI and process automation specialist who bridges technology and operations, combining a Computer Engineering degree with a dual Master's in Management and Supply Chain Operations. I turn manual finance and operations processes into reliable automated workflows, and work closely with finance. Equally comfortable in process design, hands-on building and training non-technical colleagues.

PROFESSIONAL EXPERIENCE

AI Automation Specialist <i>Dott</i> - Built an AI-OCR pipeline (n8n, Gemini, PostgreSQL) that turns city traffic and parking fines into NetSuite vendor bills across Germany, Finland and Norway; cleared a 30,000+ document backlog and removed manual AP data entry (96% extraction accuracy). - Automated German fines processing with Finance, cutting late-payment penalties from 23% to 2%. - Redesigned the billing model with Finance and local operations, moving to one bill per fine with an approval gate so city payment references reconcile in NetSuite. - Led a company-wide automation hackathon: 60 participants across 13 teams delivered 13 production workflows, saving 500+ hours a year. - Wrote an automation handbook and trained 200+ non-technical employees. - Deployed a GenAI triage workflow for a high-volume PR inbox, cutting response time from 1 week to 1 day. - Built a library of 400+ workflow templates, saving an estimated 100+ hours of development time.	Oct 2025 – Present Paris, France
Content Consultant (Freelance) <i>Fiverr</i> Advised 166 clients on video strategy; won 100+ repeat contracts and held a 5.0/5.0 rating across 100+ reviews.	Oct 2022 – Oct 2023 Mumbai, India
Operations Executive <i>Mahindra Logistics</i> - Automated SAP–SQL inventory reconciliation across 10,000+ transactions, cutting inventory errors by 20%. - Designed an Excel labour-allocation model that raised warehouse productivity by 15%. - Built supplier performance dashboards cutting supplier delays by 12% and lifted on-time delivery to 98%.	Jul 2021 – Sep 2022 Mumbai, India

EDUCATION

Responsible Procurement & Supply Chain Management <i>Audencia Business School (Grande École)</i> Relevant Coursework: AI and Digital Transformation, Operations Planning, Financial Analysis, Strategic Management, Green Logistics Management, Purchasing Management.	Jan 2026 Nantes, France
Bachelors in Computer Science & Engineering <i>Mumbai University</i> Relevant Coursework: SQL Database Management, Algorithm Analysis, Big Data, Machine Learning.	Jun 2021 Mumbai, India

PROJECTS

Strategy Hackathon with Grain de Sail <i>Audencia Business School</i> Led a 6-member cross-functional team to the finals, pitching a sustainable procurement and inventory diversification strategy directly to the CEO that is currently implemented for company use.	May 2024
Alzheimer's Disease Detection Using Deep Learning-CNN  Developed a ResNet CNN tool trained on 6,000 MRI scans for Alzheimer's detection, achieving 88% accuracy and publishing an internationally cited article detailing an 8% boost in diagnostic accuracy.	Jun 2021

SKILLS

Automation Tools — n8n, Make, Zapier, Power Automate, LLM APIs (Gemini), AI-OCR / document extraction
Programming & Analytics — Javascript, Python, PostgreSQL, BIG Query, Grafana, LLM Orchestration, MLOps.
ERP & Finance systems — NetSuite (REST API, SuiteQL, vendor bills), SAP, accounts payable and P2P processes

LANGUAGES

English — Fluent | **French** — Elementary | **Hindi** — Native/Bilingual
