PROFILE

AI and Process Automation Specialist with 3+ years turning finance and operations processes into data-driven, automated solutions. Experienced in gathering requirements with cross-functional stakeholders, SQL and BI reporting, and putting GenAI into production across European markets. Background in Computer Engineering and Data Analytics.

PROFESSIONAL EXPERIENCE

AI Automation Specialist Oct 2025 – Oct 2026
Dott Paris, France

- Mapped the manual fines process with stakeholders, then built an n8n pipeline: Gemini extracts PDF data (96% accuracy), SQL validates it in BigQuery, and approved fines post to NetSuite via REST API, saving finance 8 hours a week.
- Cleared a 30,000+ document backlog across Germany, Finland and Norway, cutting late-payment penalties from 23% to 2%, with root-cause fixes so errors did not recur.
- Built GenAI agents in n8n: a Gemini copywriter for push, in-app and email campaigns in 14 languages with a human approval loop, and PR inbox triage cutting response time from 1 week to 1 day.
- Led an automation hackathon (60 participants, 13 teams) and trained 200+ non-technical employees, delivering 45 production workflows that save 850+ hours a year.

BI Consultant (Freelance) Oct 2022 – Oct 2023
Fiverr Mumbai, India

- Delivered 100 projects for 35 clients across APAC (5.0/5.0 across 100+ reviews), scoping each with a project charter, measurable KPIs and agreed success criteria.
- Built automated reporting in Power BI and Microsoft Fabric (ETL, lakehouse/DWH, DAX time intelligence) with decision-focused dashboards, cutting manual reporting by 5–10 hours per client per week.

Operations Analyst Jul 2021 – Sep 2022
Mahindra Logistics Mumbai, India

- Automated SAP–SQL inventory reconciliation across 10,000+ transactions, cutting inventory errors by 20%.
- Built supplier performance dashboards on Power BI that cut supplier delays by 12% and lifted on-time delivery to 98%.

EDUCATION

MSc in Responsible Procurement & Supply Chain Management Sep 2023 – Jan 2026
Audencia Business School (Grande École) Nantes, France
Relevant Coursework: AI and Digital Transformation, Financial Analysis, Strategic Management.

Bachelors in Computer Science & Engineering Jul 2017 – Jun 2021
Mumbai University Mumbai, India
Relevant Coursework: Machine Learning, Data structures and Algorithms, Database Management,Computer Network, Big Data.

PROJECTS

Strategy Hackathon with Grain de Sail Apr 2024 – May 2024
Led a **6-member cross-functional team** to the finals, pitching a sustainable procurement and inventory diversification strategy directly to the CEO that is currently implemented for company use.

Alzheimer's Disease Detection Using Deep Learning-CNN Jul 2020 – Jun 2021
Developed a ResNet CNN tool trained on **6,000 MRI scans** for Alzheimer's detection, achieving **88% accuracy** and publishing an internationally cited article detailing an **8% boost** in diagnostic accuracy.

SKILLS

Automation & AI — n8n, Make , Power Automate, LLM APIs, Gemini, Claude Code, Cursor, Prompt engineering, Zapier.

Code, Data & BI — JavaScript, JSON, Python, PostgreSQL, BigQuery, Git, Grafana, Tableau, Power BI, Figma.

Integration & ERP — REST APIs, Fast APIs, OAuth 1.0 and 2.0, Webhooks, SAP.

LANGUAGES

English — Fluent | **French** — Basic | **Hindi** — Native/Bilingual
